

Igor Mihovilović

SuSy feedback

"My introduction to the Susy Program was when I first came to "Tala" dance center in Zagreb. This was in November of 2015. and throughout this period I had personal luck of assisting international art and dance projects as well as assisting local production in the field of contemporary dance. For someone interested in cultural education and always more practical knowledge this was surely very beneficial situation for me. During this time I was closely related to some very interesting and quality projects and, what is even more important, I met lots of skilled, educated and open minded people which is big attainment for me. After experience like that I will surely use my potentials and widen more things I learned from this EU program in the future. This was rare and great opportunity and I am glad I could have it for my own professional development."
