Experience Letter

As a participant of the Kliker LLB dance Hub in Zagreb, October 2019 I experienced a creative and well-connected community all bound by the same cause. A big variety of artists, producer and dance and theatre maker gathered around the 3 day convention and very well used the provided opportunities and space to exchange and discuss for example the development of dance for young audience and the importance of inclusion of dance in the educational system.

The presentation of the work "Söhne", which we performed in the great theatre of cultural centre Travno, gave us possibilities to exchange and improve the ongoing research and process.

I would like to stress the importance of such dynamic hubs, which are strengthening and empowering the exchange in the field of dance for young audience!
